Drawbridge Bracket System - Used with aluminum dock only.

This system is designed to be installed without ever getting into the water! Our Drawbridge bracket system allows for easy in and out each season. Vinylwork's installation kit allows for easy installation.

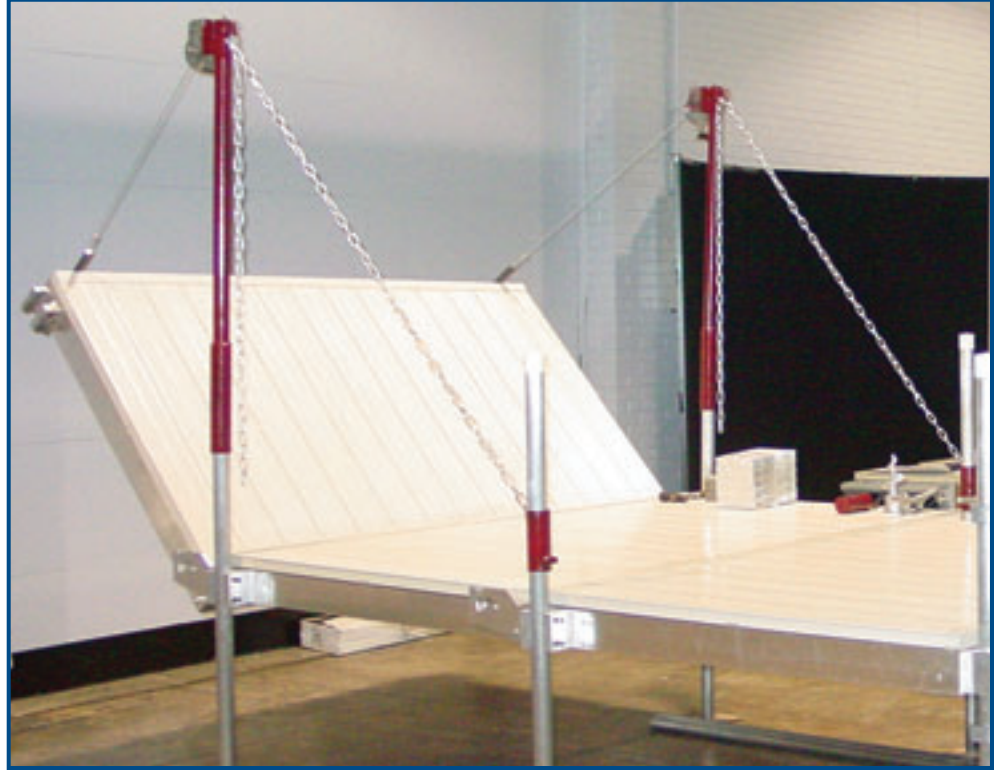

Line Bracket

End Bracket

Corner Bracket

Our drawbridge bracket system installs one section at a time. Just set up the install kit on the posts, drawbridge your section into place, set your next posts, tighten your clamps, then move on to the next section without ever getting wet! It's that easy!

L-Bracket System - Used with aluminum or wood dock.

This simple design is basically bolted together to offer a very stable system. No extra tools required.
